FACULTY OF PHARMACY

M. Pharmacy (PCI) (Pharmaceutical Chemistry/Pharmaceutics/Pharmacology /Pharmaceutical Analysis/Ph.Quality Assurance) I - Semester (Main &Backlog) Examination, June-2026

Subject: Modern Pharmaceutical Analytical Techniques

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five following questions. **(5X15=75 Marks)**

1. (a) With a neat labelled diagram explain UV/Visible instrumentation.

   (b) Briefly explain the electronic transitions with examples.

2. a) Write the principle, instrumentation and applications of Flame emission spectroscopy.
   b) Explain the molecular vibrations in IR.

3. (a) Explain the principle of proton NMR spectroscopy.
   (b) Explain the spin-spin coupling in NMR spectroscopy with suitable example.

4. a) Explain the principle of fluorescence. Add a note on quenching effect.
   b) Write notes on any two GC detectors with a neat labeled diagram?

5. a) Give a note on HPLC instrumentation with a labelled diagram.
   b) Explain Chemical shift and factors influencing chemical shift.

6. a) What is X-ray crystallography? Write Brag's law.

   b) Write a note on Zone Electrophoresis.

7. Write a note on:

   a) ELISA b) RIA

8. a) Explain Quadrupole and time of flight analyzers in detail.
   b) Briefly explain shielding and deshielding with suitable example.

FACULTY OF PHARMACY

M. Pharmacy (PCI) (Pharmaceutics) I - Semester (Main & Backlog) Examination, June 2026

Subject: Drug Delivery Systems

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. **(5 X 15 = 75 Marks)**

1) A) Discuss the factors influencing the sustained release dosage forms?
   B) classify polymers with examples?

2) A) Explain about chemical activation modulated systems?
   B) Describe the 3D printing of pharmaceuticals?

3) A) Classify the gastro retentive drug delivery systems?
   B) Write the formulation and evaluation of mucoadhesive drug delivery systems?

4) A) Discuss the formulation and evaluation of ophthalmic drug delivery systems?
   B) Give the details of the barriers in ocular drug delivery system and discuss the methods to overcome?

5) A) Classify the permeation enhancers, add their mechanism of action?
   B) Discuss the basic components used in formulation of transdermal drug delivery?

6) A) Write a note on recent advancements in vaccine drug delivery systems?

   B) Applications of single shot vaccine?

7) Write in detail about protein& peptide drug delivery systems?

8) A) Describe the concept of personalized medicines?
   B) Add a note on telepharmacy?

Code No: H-8198/PCI

FACULTY OF PHARMACY

M. Pharmacy (PCI) (Pharmaceutics) I-Semester (Main & Backlog) Examination June-2026

Subject: Regulatory Affairs

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five following questions. **5X15=75 Marks**

1. Write the importance of documentation and documents to be maintained in Pharmaceutical industry. Write about MFR, DMF and Distribution records.

2. i) Write a note on generic drugs product development.
   ii) Explain Hatch-Waxman Act and its amendments.

3. Write a note on regulatory requirement for product approval NDA, ANDA for generic drugs.

4. i) Explain evaluation of drug product performance by in-vitro studies.
   ii) Explain the objectives of CMC considerations during drug development.

5. i) Discuss about regulations for Combination products and Medical devices.
   ii) Write a note on CTD and eCTD.

6. Explain the Regulatory requirements for MHRA and EU.

7. i) Discuss about global submission of IND, NDA and ANDA.
   ii) Write a note on IMPD and IB.

8. Write a note on
   i) Clinical trial protocol ii)HIPAA

   iii) Pharmacovigilance safety monitoring in clinical trials

Subject: Modern Pharmaceutics

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. **(15 x 5 = 75 Marks)**

1) A) Describe in detail about the accelerated stability studies?
   B) Explain the preparation and evaluation of SMEEDS?

2) A) Write a note on calibration of equipment according to ICH guidelines?
   B) Explain the qualifications terms DQ, IQ, OQ and PQ?

3) Discuss in detail about the following
   A) Budget planning in industries?
   B) Inventory management and control?

4) A) Explain the compaction profile?
   B) Elaborate the solubility enhancement techniques of poorly water soluble drugs?

5) Write a note on the following
   A) ANOVA test B) Model dependent kinetics?

6) A) Discuss application of factorial design in the pharmaceutical formulation and optimization?
   B) Add a note on calculations f1 &f2 factors in the comparison of dissolution profiles?

7) A) Discuss the preparation and evaluation of parenterals?
   B) Describe any three methods for determination of drug excipient compatibility studies?

8) Add a note on the following
   A) Total quality management?
   B) Student t-test?

M. Pharmacy (PCI) - Pharmaceutical Chemistry/Pharmaceutics/Pharmacology /Pharmaceutical Analysis/Ph.Quality Assurance
I - Semester (Backlog) Examination, December 2025
(Common paper for all Streams)

Subject: Modern Pharmaceutical Analytical Techniques

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1. (a) State and Explain Beer- Lambert's law. Add a note on the deviations from Beer's law.
   (b) Explain the principle of flame photometry (7+8 Marks)
2. (a) Explain the sampling techniques in IR spectroscopy.
   (b) List and explain the IR detectors. (7+8 Marks)
3. (a) Define chemical shift. What are the factors affecting chemical shift?
   (b) Explain the spin-spin coupling in NMR spectroscopy with suitable example. (7+8 Marks)
4. What is the principle of MS? With a neat labelled diagram briefly explain the components of MS instrumentation. (15 Marks)
5. Explain the principle, instrumentation and application of capillary electrophoresis giving a neat labelled diagram. (15 Marks)
6. (a) Explain Bragg's equation and derive the equation.
   (b) List and explain the different **methods** used for X-ray diffraction studies. (7+8 Marks)
7. (a) What is the principles of Fluorescence? Add a note on the factors affecting fluorescence and quenchers in fluorescence.
   (b) What are the applications of AAS? (9+6 Marks)
8. (a) Explain the principle and instrumentation of HPLC.
   (b) List and explain any 3 GC detectors. (7+8 Marks)

M. Pharmacy (Pharmaceutics) I - Semester (PCI) (Backlog) Examination, Dec. 2025

Subject: Drug Delivery Systems

Time: 3 Hours **Max. Marks: 75**

Note: Answer any Five from the following questions. **(5x15=75)**

1. a. Define sustained and controlled release drug delivery systems. (5 Marks)
   b. Explain in detail biological approaches to fabricate sustained and controlled release formulations. (10 Marks)

2. a. What are biodegradable polymers. Explain with examples. What is mechanism of drug release through biodegradable polymers. (9 Marks)
   b. Write a note on bioelectronic medicines. (6 Marks)

3. a. Explain feedback regulated drug delivery system. (7 Marks)
   b. Write a note on osmotically controlled drug delivery system. (8 Marks)

4. a. Explain the principle of mucoadhesion. (8 Marks)
   b. Explain the methods to evaluate buccal drug delivery system. (7 Marks)

5. a. What are ocular novel drug delivery system. How ocular barriers prevent the drug Permeation (5 Marks)
   b. Explain the structure of skin and its barriers. How to overcome the barriers using permeation enhancers and describe the mechanism of permeation enhancers with examples. (10 Marks)

6. a. Describe evaluation of transdermal drug delivery system (10 Marks)
   b. Mention the barriers of protein drug delivery systems. (5 Marks)

7. Describe the formulation and evaluation of protein drug delivery system (15 Marks)

8. a. What are vaccine drug delivery system (5 Marks)
   b. Explain mucosal and transdermal delivery of vaccines. (10 Marks)

1. a) Explain the electronic transitions with suitable examples
   b) State and explain Beer- Lambert's law. Add a note on the deviations from Beer's law. (6+9)

2. a) Explain the sampling techniques in IR spectroscopy.
   b) What are the applications of IR spectroscopy (9+6)

3. a) What is the principles of flame photometrty? Explain the instrumentation.
   b) What are the factors affecting fluorescence? (9+6)

4. a) Explain chemical shift and the factors affecting chemical shift ?
   b) Draw a schematic NMR spectrum and explain splitting α signal intensity. (10+5)

5. With a neat labelled diagram, explain MS instrumentation. Draw MS spectrum for any two compounds α explain its peaks.

6. a) Classify the ionization techniques in MS. Explain any three methods in detail.
   b) Explain the fragmentation rules in MS. (9+6)

7. a) Explain HPLC instrumentation with a labelled diagram.
   b) Explain the factors affecting resolution & peak symmetry. (8+7)

8. a) Explain the principle and applications of capillary electrophoresis
   b) Classify the types of crystals and add a note on the applications of X-ray diffraction. (8+7)

FACULTY OF PHARMACY

M. Pharmacy (Pharmaceutics) I Semester (PCI) (Backlog) Examination, November 2023

Subject: Regulatory Affairs

Time: 3Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks

1. a) Explain Hatch-Waxmann Act and its Amendments. [9]
   b) Write a note on Master formula record. [6]

2. a) Explain the regulatory requirements for approval of API. [8]
   b) What is the impact of outsourcing Bioavailability and Bioequivalence studies to Contract Research Organisations (CRO) [7]

3. a) Explain ANDA approval process. [8]
   b) Explain the regulatory requirements for approval of NDA for novel therapies. [7]

4. a) Write a note on chemistry, manufacture and control in pharmaceutical industry. [9]
   b) Write a note on Regulations for Medical devices. [6]

5. a) Explain the regulatory requirements of Europe Union. [9]
   b) Write a note on Investigation medicinal products dossier. [6]

6. a) Write a note on global submission of NDA. [8]
   b) Write a note on Investigator Brochure. [7]

7. Discuss about (a) Health Insurance Portability and Accountability Act. [9]
   b) Institutional Review Board. [6]

8. a) Write a note on Pharmacovigilance and safety monitoring in clinical trials. [9]
   b) Write a note on CTD format. [6]

****

FACULTY OF PHARMACY

M. Pharmacy (Pharmaceutics) I Semester (PCI) (Backlog) Examination, November 2023

Subject: Modern Pharmaceutics

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1. List out the methods used for drug- excipient interactions and discuss any three methods in detail with examples? [15]

2. (a) Discuss the ICH guidelines for calibration and validation of equipment with an example? [10]
   (b) Write about validation and it's types? [5]

3. (a) Write a note on inventory management and production control management? [10]
   (b) Describe the layout of buildings, services according to GMP? [5]

4. Discuss the methods for enhancement of aqueous solubility of drugs? [15]

5. (a) Discuss ANOVA?
   (b) Describe the comparison of dissolution profiles using f1 and f2 factors?

6. (a) Discuss about the factorial designs for optimization of formulation? [8]
   (b) Explain the terms DQ, IQ, OQ and PQ? [7]

7. (a) Explain the phases of compaction profile? [7]
   (b) Write a note on Total quality management? [8]

8. (a) Discuss about SMEDDS and their method of preparation? [8]
   (b) Write about the variance and standard deviation and their application in pharmaceutical formulations? [7]

FACULTY OF PHARMACY

M. Pharmacy (Pharmaceutics) I Semester (PCI) (Backlog) Examination, November 2023

Subject: Drug Delivery System

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1. a) What do you mean by personalised drug delivery system?
   b) Write a note on 3D printing of pharmaceuticals and telepharmacy

2. a) Describe the various principles involved in rate controlled drug delivery system.
   b) Write a note on pH & enzyme activated system.

3. a) What are the advantages and disadvantages of buccal drug delivery system. How buccal formulations are evaluated?
   b) Describe in detail any two theories of mucoadhesion.

4. a) What are the barriers and explain various methods to overcome the barriers of ocular drug delivery system.
   b) With a neat sketch draw the structure of the skin. What are the barriers of skin? What are the techniques to overcome the skin barriers?

5. a) Explain in detail mucosal delivery of vaccines.
   b) Write a note on single shot vaccines.

6. a) Explain matrix and reservoir type of transdermal drug delivery system.
   b) Explain any five evaluation methods of transdermal formulations?

7. a) Explain strategies to formulate a stable protein and peptide drug formulations.
   b) Describe physical and chemical stability of proteins.

8. a) What are biodegradable polymers? Explain various mechanism of polymer degradation from a drug delivery system.
   b) What are the applications of polymers in controlled drug delivery system.

M. Pharmacy I Semester (PCI) (Common to all) (Main & Backlog) Examination, May 2023

Subject: Modern Pharmaceutical Analytical Techniques

Time: 3 Hours **Max. Marks: 75**

Note: Answer any Five Questions. All Questions carry Equal marks.

1. a) With a neat labelled diagram explain UV/Visible instrumentation.
   b) What are the criteia in the solvent selection for UV spectroscopy? Give examples for solvents. What is meant by solvent effect? (9+6)

2. a) Explain the Principle, advantages and instrumentation of FTIR with a neat labelled diagram.
   b) Explain the molecular vibrations in IR spectroscopy. (10+5)

3. a) Explain the principle of fluorescence. Add a note on quenching effect
   b) With a diagram explain the instrumentation for AAS. (8+7)

4. a) Explain the principle of proton NMR spectroscopy.
   b) Explain the spin-spin coupling in NMR spectroscopy with suitable example. (7+8)

5. a) Explain the principle of mass spectroscopy.
   b) Explain any two mass analysers used in MS in detail. (7+8)

6. a) Explain GC instrumentation with a labelled diagram.
   b) Explain the applications of XRD technique. (9+6)

7. a) Explain the instrumentation & working of HPLC. (8+7)
   b) Explain the factors affecting resolution & Peak symmetry.

8. Define and classify the electrophoretic techniques. Explain the principle and applications of gel electrophoresis. (15)

Subject: Drug Delivery System

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. **(5 x 15 = 75 Marks)**

1. a) Define sustained release and controlled release drug delivery system? What are the advantages and disadvantages of sustained/controlled release formulations?
   b) Explain in detail various physiochemical approaches for controlled release formulations.

2. a) Explain the mechanism of polymer degradation.
   b) Explain in detail applications of polymers in controlled release formulations.

3. a) Define pharmacogenetics. Write a note on personalised medicines?
   b) Write in detail about bioelectronic medicines and telepharmacy.

4. a) What are rate controlled drug delivery system?
   b) Explain in detail oral and injectable osmotic drug delivery system.

5. What are the advantages of targeting the drug delivery system to GI tract. Classify and explain in gastro-retentive drug delivery system.

6 a) What are permeation enchancers, explain the mechanism of transdermal permeation enhancers with examples.
   b) Explain the permeation barriers of ocular drug delivery system

7. What do you mean by single shot vaccines? Explain stability of proteins.

8. What are the barriers of protein drug delivery system? Explain formulation and evaluation of protein drug delivery system.

Subject: Cosmetics and Cosmeceuticals

Time: 3 Hours **Max Marks: 75**

Note: Answer any five questions. All questions carry equal mark.

1. (a) Define the terms Cosmetics, Misbranded cosmetics, Spurious cosmetics. Write a note on Offences and Penalties with regard to manufacture and sale of cosmetics.
   (b) Write a note on conditions for obtaining licence for manufacture and sale of cosmetics.

2. (a) Discuss the problems relating to skin.
   (b) Discuss about the cleansing and care needs for body.

3. (a) Write a note on regulatory provisions relating to labeling of cosmetics
   (b) Write a note on structure of hair and hair growth cycle.

4. (a) Discuss about the building blocks for formulation of tooth paste.
   (b) Write a note on emollients and rheological additives.

5. (a) Describe cosmeceutical products for acne and sun-protection.
   (b) Write a note on cosmeceuticals for sensitive teeth.

6. Describe the COSMOS guidelines for herbal cosmetics.

7. (a) What are the challenges in formulating herbal cosmetics.
   (b) List the herbal ingredients used in Hair care.

8. (a) Write a note on formulation of soaps and syndet bars.
   (b) Write a note on sunscreens.

Subject: Pharmacotherapeutics - II

Time: 3 Hours **Max Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1. a) Write a detailed note on etiology of Parkinson's disease. Explain the motor complications of L-Dopa. [9+6]
   b) Define an epileptic seizure and explain the classification of seizures based on clinical features.

2. a) Classify Pain and explain the pathophysiology of nociceptive pain. [9]
   b) Explain different hypotheses explaining pathophysiology of depressive disorders. [6]

3. a) Classify Acute Kidney Injury and explain the types. Add a note on non-dialysis management of AKI. [10]
   b) Give a detailed account of drug induced renal diseases. [5]

4. a) Discuss the clinical presentation of acute meningitis. Briefly explain the etiology and management of meningitis. [10]
   b) Give an outline of the management of chronic bronchitis. [5]

5. a) Explain the clinical presentation and management of diarrhea. [8]
   b) Discuss the etiology and pharmacotherapy of Urinary tract infections. [7]

6. a) Explain the Antimicrobial Prophylaxis used in Specific Surgical Procedure. [7+8]
   b) What are the common opportunistic infections in a HIV patients? Explain their management.

7. a) Give an outline of treatment strategy in Acute leukemia with the help of an algorithm. [9]
   b) Explain the Tumor lysis syndrome. [6]

8. a) Write a detailed note on hormone replacement therapy. [7]
   b) Explain the treatment of stage I and II of non-small cell lung cancer. [8]

Subject: Modern Pharmaceutical Analytical Techniques

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. **(5 x 15 = 75 Marks)**

1 (a) State and explain Beer-Lambert's Law. Add a note on the deviations from Beer's law.
(b) Explain the concept of chromophore, auxochrome and bathochromic shift with suitable examples.

2 (a) Explain the instrumentation of FTIR with a neat labelled diagram. Add a note on the advantages of FTIR.
(b) Explain the mplecular vibrations in IR.

3 (a) What is the principle AAS? Explain the instrumentation.
(b) List the differences between AAS and flame photometry.

4 What is the significance of chemical shift? What are the factors affecting chemical shift? Name the internal standard and justify its selection as internal standard in NMR spectroscopy.

5 What is the principle of Mass Spectrometry? With a neat labelled diagram briefly explain the components of MS instrumentation.

6 (a) Classify the ionization techniques in MS. Explain any three methods in detail.
(b) Define Base peak, molecular ion peak and metastable ion.

7 (a) Explain the principle of X-ray diffraction.
(b) Explain HPLC instrumentation with a labelled diagram.

8 (a) Explain the experimental set up required for gel electrophoresis.
(b) Describe the principle and applications of RIA.

FACULTY OF PHARMACY
M.Pharmacy (Pharmaceutics) I Semester (PCI) (Main & Backlog) Examination, July 2021

Subject: Drug Delivery System

Time: 2 Hours **Max. Marks: 75**

Note: Answer any three from the following questions. **(3 x 25 = 75 Marks)**

1 (a) Define sustained release, delayed release and controlled release drug delivery system with examples.
(b) Define pharmacogenetics. Explain Bioelectronic medicines.

2 (a) Classify activation modulated system. Explain osmotic drug delivery system.
(b) What are rate controlled drug delivery system? Explain feedback regulated systems.

3 (a) Mention the various barriers of buccal mucoadhesive drug delivery system. Mention two exmaples of marketed mucoadhesive drug delivery system.
(b) What are the drug properties to formulate as a FDDS? Explain in detail floating drug delivery system.

4 (a) Describe formulation and evaluation of ocular drug delivery system.
(b) Write a note on ocular insitu gels.

5 (a) Explain structure of skin. What are barriers of transdermal permeation? What are the ideal properties of a drug candidate to permeate through the skin?
(b) Classify transdermal permeation enhancers. Explain the mechanism of permeation enhancers.

6 (a) Describe in detail different strategies to formulate a stable protein and peptide drug formulations.
(b) Describe physical and chemical stability of proteins and peptides.

7 (a) Explain in detail mucosal and active transdermal methods of delivering vaccines through mucosa and skin.
(b) Explain single shot vaccines.

8 (a) Explain various physicochemical and biological factors that influences the formulation of SR and CR formulations.
(b) Classify polymers. Describe properties of any two synthetic non-biodegradable polymers.

****

Code No. 12118/PCI

FACULTY OF PHARMACY
M.Pharmacy (Pharmaceutics) I Semester (PCI) (Main & Backlog) Examination, August 2021

Subject: Regulatory Affairs

Time: 2 Hours **Max. Marks: 75**

Note: Answer any three of the following questions. (3 x 25 = 75 Marks)

1 (a) Explain CFR with respect to Pharmaceutical product development.
(b) Write a note on generic drugs product development.

2 (a) Explain the importance of documentation and documents to be maintained in Pharmaceutical industry.
(b) What is the impact of outsourcing Bioavailability and Bioequivalence studies to Contact Research Organisations (CRO).

3 (a) Explain SUPAC guidelines for Immediate release dosage form.
(b) Explain evaluation of drug product performance by *invitro* studies.

4 Write a note on
(a) CTD and eCTD.
(b) Regulations for combination products.

5 Explain the regulatory requirements of TGA.

6 Discuss about
(a) Health Insurance Portability and Accountability Act.
(b) Institutional review board/ independent ethics committee.

7 Write a note on investigation of medicinal products dossier (IMPD) and Investigator brochure.

8 Write a note on
(a) Pharmacovigilance and safety monitoring in clinical trials.
(b) Enlist ICH Efficacy guidelines.

FACULTY OF PHARMACY

M. Pharmacy (pharmaceutics) I-semester (PCI) (Suppl.) Examination, October 2020

Subject: Drug Delivery System

Time: 2 hrs **Max Marks: 75**

Note: Answer any three questions. **(3x25=75 Marks)**

1. Explain different mechanisms of drug delivery from sustained or controlled release formulations? Add a note on application of polymers in sustained release dosage forms?

2. What do you mean by personalized medicines? Describe in detail 3D printing of pharmaceuticals and telepharmacy.

3. Explain the principles of rate-controlled drug delivery systems? Write a note on feedback regulated drug delivery systems?

4. a) Mention different types of gastro-retentive drug delivery system?
   b) Describe in detail floating drug delivery system and its evaluation?

5. a) Describe in detail formulation and evaluation of buccal drug delivery system?
   b) Explain the different factors affecting mucosal drug permeation?

6. a) Describe barriers of ocular drug delivery system and what are the methods to overcome the same?
   b) Describe ideal properties of a drug to formulate as a transdermal drug delivery system?

7. a) Describe different routes of administration of protein drug delivery and its barriers of permeation ?
   b) Explain stability of protein pharmaceuticals?

8. What do you mean by single shot vaccine delivery systems? Explain mucosal delivery of vaccines?

FACULTY OF PHARMACY

M. Pharmacy I – Semester (Main & Backlog) Examination, January 2020
(Common Paper for all Except Pharmacy Practice)

Subject : Modern Pharmaceutical Analytical Techniques

Time: 3 Hours **Max. Marks: 75**

Note: Answer any Five Questions. All Questions Carry Equal Marks.

1. (a) State and explain Beer- Lambert's law. Add a note on the deviations from Beer's law. 8
   (b) Explain solvents and the selection criteria for UV/Visible spectroscopy. 4
   (c) What is solvent shift? 3

2. (a) Explain the principle and instrumentation of FTIR with a neat labelled diagram. 8
   (b) Explain about the sampling techniques and applications of FR spectroscopy 7

3. (a) What is the principle of Fluorescence? Explain the radiative and non radiative pathways of relaxation. 7
   (b) Add a note on the factors affecting fluorescence and quenchers in fluorescence. 6
   (c) What are the criteria for a molecule to exhibit the phenomena of fluorescence 2

4. (a) Explain the principle of proton NMR spectroscopy. 5
   (b) What is the significance of chemical shift. What are the factors affecting chemical shift ? 6
   (c) Explain about spin-spin crippling and it's importance in NMR 4

5. (a) Classify the ionization techniques in MS. Explain any three methods in detail. 12
   (b) Differentiate between Base peak and molecular ion peak. 3

6. (a) Explain HPLC instrumentation. 10
   (b) What are the applications of HPLC? 5

7. (a) Explain Braggs equation and derive the equation. 8
   (b) What is the principle involved in rotating crystal technique? 7

8. Explain the principle, working and applications of
   (a) Capillary electrophoresis $7^{1/2}$
   (b) Gel electrophoresis $7^{1/2}$

FACULTY OF PHARMACY

M. Pharmacy (Common to All) I-Semester (PCI) (Main) Examination,
February 2018

Subject: Modern Pharmaceutical Analytical Techniques

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1 (a) Derive the expression for Beer-Lambert law and explain the deviations with examples. (9)
(b) Explain the solvent effect with examples. (3)
(c) Discuss about the principle and functions of monochrometors in UV spectrophotometer. (3)

2 (a) Draw schematic IR spectrum for any one compound and indicate the absorption wave numbers regions for any four functional group in the compound. (5)
(b) Explain various kinds of IR vibraitonal modes and their energy levels. (5)
(c) Explain the sampling methods for liquids and solid samples for taking IR spectra. (5)

3 (a) Explain the principle and instrumentation of NMR spectroscopy. (10)
(b) Draw a schematic HNMR spectrum for any one simple compound and explain the following
(i) Chemical shift values (ii) Nature of protons (iii) Number of protons (5)

4 (a) Explain about the ionisation techniques – electron impact, chemical ionisaiton, FAB and MALDI and their advantages and disadvantages. (12)
(b) What are Isotopic peaks and how they are identified. What is the importance of isotopic peaks? (3)

5 (a) Discuss the theory of HPLC. Describe the instrumentation and working of HPLC with the help of a neat labeled diagram. (10)
(b) Draw a schematic HPLC chromatogram and explain (i) Resolution, (ii) tailing (iii) peak symmetry (5)

6 (a) Discuss the theory and principle of electrophoresis. Explain the method of gel electrophoresis and its applications with examples. (12)
(b) What is isoelectric focusing? (3)

7 (a) Discuss about various types of detectors used in gas chromatography. (11)
(b) Explain about moving boundary electrophoresis with required labeled diagram. (4)

8 Write a note on : (6)
(a) Emission spectroscopy (9)
(b) Instrumentation and application of florescence spectroscopy

Code No. 1155/PCI

FACULTY OF PHARMACY

M. Pharmacy (Pharmaceutics) I-Semester (PCI) (Main) Examination, February 2018

Subject: Modern Pharmaceutics

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1	(a) Discuss the different orders of reaction and their applications?	7
	(b) Discuss the production facilities and formulations of parenterals?	8
2	(a) Discuss the ICH guidelines for calibration and validation of equipment with an example?	8
	(b) Describe the validation of tableting process?	7
3	(a) Discuss the sales forecasting and budget planning in pharmaceutical industries?	8
	(b) Describe the layout of buildings, services, equipment and their maintenance in industries?	7
4	(a) What is compaction profile? Explain the phases of compaction profile with a suitable examples?	5
	(b) Define the term intrinsic solubility ? How to determine ? it's significance?	5
	(c) Explain the properties of granules effecting the compression behavior of tablets?	5
5	(a) Discuss student t-test and it's applications?	5
	(b) Discuss the pharmacokinetic parameters for determination of bioavailability?	5
	(b) Describe the comparison of dissolution profiles of dosage forms using similarity and difference factors?	5
6	(a) Describe the influence of temperature on rate of reaction?	3
	(b) Explain the methods for testing of drug excipient compatability studies?	6
	(c) Describe the preparation of SMEDDS and their evaluation tests?	6
7	(a) Describe the preformulation of suspensions?	4
	(b) Explain the ANOVA test?	7
	(c) Describe the sterilization procedures for evaluation of parenterals?	4
8	(a) Discuss the methods for improvement of aqueous solubilty of drugs?	8
	(b) Write Heckle equation and draw Heckle plots for porosity and explain them?	7

*****

Code No. 1154/PCI

FACULTY OF PHARMACY

M. Pharmacy (Pharmaceutics) I-Semester (PCI) (Main) Examination, February 2018

Subject: Drug Delivery Systems

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1 a) Discuss in detail about biodegradable and natural polymers. (8)
b) Write a note on customized drug delivery system. (7)

2 Classify various types of rate preprogrammed drug delivery systems with suitable examples. (15)

3 Give detailed account of various formulation mechanisms in gastric retentive drug delivery system. (15)

4 a) Discuss in detail formulation approaches for TDDS with suitable examples. (10)
b) What are barriers of permeation for TDDS? (5)

5 a) Discuss about different approaches to overcome occular barrier. (8)
b) Explain uptake of antigen in vaccine delivery system with neat diagram. (7)

6 Write about various formulation approaches and evaluation of protein and peptide delivery systems. (15)

7 a) Explain principle involved in mucoadhesion. Describe various theories to explain mucoadhesion. (8)
b) Explain in brief mechanism of drug release from sustained release formulation. (7)

8 Write a short note on
(a) Bioresponsive drug delivery systems. (8)
(b) pH activated drug delivery system. (7)

*****

Code No. 1156/PCI

FACULTY OF PHARMACY

M. Pharmacy (Pharmaceutics) I-Semester (PCI) (Main) Examination, February 2018

Subject: Regulatory Affairs

Time: 3 Hours **Max. Marks: 75**

Note: Answer any five questions. All questions carry equal marks.

1	(a) Explain Hatch-Waxmann Act, its benefits in generic approval.	(10)
	(b) Write a note on Bolar Amendment.	(5)
2	Explain NDA regulatory approval process.	(15)
3	What are the regulatory requirements for approval of biologics?	(15)
4	Write a note on	
	(a) CTD and eCTD	(9)
	(b) ICH Quality guidelines	(6)
5	Explain the regulatory requirements of TGA	(15)
6	Discuss about global submission of ANDA	(15)
7	Write a note on	
	(a) HIPAA	(6)
	(b) Pharmacovigilance safety monitoring	(9)
8	Write a note on	
	(a) Investigator brochure	(8)
	(b) Clinical trial protocol	(7)
